

CSE464Project1

Features per commits

1. Feature 1

- parseGraph(filepath)
- toString()
- outputGraph(filepath)

2. Feature 2

- addNode(label)
- addNodes(labels[])
- duplicate node handling

3. Feature 3

- addEdge(srcLabel, dstLabel)
- duplicate edge handling

4. Feature 4

- outputDOTGraph(path)
- outputGraphics(path, format) To test the code run the following command to build

mvn clean test package

Once the build is successful run the following command

```
mvn -q exec:java
-Dexec.mainClass=edu.asu.cse464.dot.App
-Dexec.args="./input.dot ./out"
```

the example input is

```
digraph G { a -> b; b -> c; a; "node x" -> c; }
```

The plain text out put is

```
Nodes (4): [a, b, c, node x]
```

```
Edges (3):
```

```
  a -> b
```

```
  b -> c
```

```
node x -> c
```

and the image should be
